A MESSAGE FROM THE SUPERINTENDENT

Raymond Barber
Superintendent of Public Instruction

The successful school leader is constantly alert to opportunities for improvements in school operations. The implementation of needed changes begins with a systematic self-appraisal.

The Department of Education, cognizant of the many demands on the school administrator, has in this bulletin compiled data to aid in this process of self-appraisal.

Utilization of these data, combined with additional information and observation by the district administrator, should provide a means of defining problem areas in a district. Once identified, concerted efforts can be directed toward effecting solutions.

Raymond Barber

RAYMOND H. BARBER
Superintendent of Public Instruction

Foreword

This study was originally undertaken by the State Department of Education in 1966 to provide local school administrators with data that can be used in a self-evaluation and analysis of their districts. The basic concept of the study was to collect data using the criteria established by the Cresap, McCormick, and Paget Management Consultants in their 1964 report to the Kentucky Commission on Public Education as factors that could be used to help evaluate school districts. The factors used by the management consultant firm were major factors relating to school quality as identified through research over the past 20 years and those that superintendents felt were important indicators of quality that could be measured objectively.

This edition of the Profiles of Kentucky Public Schools is comprised of 17 factors. It should be noted that this study contains only the first of three parts of an evaluation system, a statistical review. The other two recommended parts are: (1) a statewide achievement testing program, and (2) an educational and management audit. Each of the 17 factors has been summarized by Educational Development Regions. On page 28 is a regional map to facilitate your use of this document. Again, a twelve-year history of the state averages on each of the 17 factors, "State Averages and Trends," has been included in order to provide a historical perspective on changes in Kentucky education.

The individual local district profiles which, until last year, have been included in this report, are again excluded to reduce printing costs. If any of these profiles are desired, they can be obtained upon request from the Research Unit of the Office of Research and Planning, Capital Plaza Tower, Frankfort, Kentucky 40601. Phone: (502) 564-4394.

Acknowledgements

The Office of Research and Planning is most appreciative of the assistance given by the Office of Management Information Services in getting this document ready for publication. It is difficult to estimate the time it would have taken to have manually organized the data published in this report. A special note of thanks must be extended to Wendell McCourt, who provided assistance in every phase of this report.

Introduction

This report represents a collection of data for each of the 181 local school districts in Kentucky for the 1978-79 school year. The factors included in this report are criteria that have been identified as indicators of quality education that could be measured objectively. It is realized that whenever quality of education is examined, there are a great many intangible factors that are essential to the existence of quality education that cannot be measured. However, it is felt that through careful use of the factors presented in this report, some understanding of the strengths and weaknesses of a school district can be brought to light.

The basic criteria used were suggested by the Cresap, McCormick and Paget Management Consultants in a study submitted to the Kentucky Commission on Public Education in 1964. In order to better understand this study, one should be aware of this 1964 report. The following is a brief explanation of this report.

Cresap, McCormick and Paget Study

The objectives of the study performed for the Commission on Public Education in cooperation with the Kentucky State Department of Education were threefold:

1. To develop a method for evaluating the educational output and the administrative practices of school districts of Kentucky.

2. To prepare an evaluation tool for use by the local school districts in self-evaluation.

3. To ensure that the State Department personnel are equipped to continue the use of the techniques that have been developed as a primary means of channeling their work toward local district educational improvement.

It is apparent that one of the primary functions of this study was the development of an evaluation instrument. The instrument needed was one that would combine the qualities of having the capacity to be applied annually or biennially to all districts at the same time, at a minimum cost, with limited manpower, and the ability to identify areas for improvement in local districts. The authors of the study felt that the results of the study should be limited to comparison with other districts of the state and not with other states or with national performance.

The method of study and sources of information used by Cresap, McCormick and Paget are as follows:

1. Interviews were held with 33 persons from outside the state of Kentucky reputed to be knowledgeable in methods of evaluating education. These included persons from university staffs, state departments of education, the U.S. Office of Education, National Education Association, public school systems, special research projects, and educational publishing companies.

2. Interviews were held with 45 persons in the state of Kentucky who were themselves educators or who had a deep interest in the educational system of the state. These included the State Superintendent, members of the State Board of Education and State Department of Education, state universities and colleges, superintendents, principals, supervisors, and teachers in the local districts.

3. A questionnaire which included questions about evaluation was completed by almost 100 local school superintendents.

4. The survey team and members of the State Department of Education participated in a special workshop held by the New York State Education Department on the subject of educational evaluation.

5. Factors to be used were then validated for use in Kentucky through data collected.

6. The proposed procedure was reviewed by a panel of educators who have devoted considerable work to the problems of evaluation.

Using the preceding sources, the consultant firm forwarded its findings to the Commission on Public Education. The recommendations forwarded to the commission listed the following segments of an evaluation procedure:

1. An analysis of districts on the basis of eight statewide statistical factors to aid local districts in identifying areas that may need special attention to improve their educational system.

2. A statewide achievement testing program should be instituted.

3. A management audit should be made.

This report is intended to aid the local school administrator in evaluating his district by supplying needed data and giving a source for comparison with other districts.

Methodology

With the valuable assistance and complete cooperation of the Office of Management Information Services, a system was designed to produce this bulletin.

Most of the information needed had previously been collected and stored in computer files by the Office of Management Information Services. The exceptions being: factors (3) Percent Supplement by District for Instructional Salaries, and (17) Percent of Economically Deprived Children.

The state averages were found and the deviations from the state averages computed for each individual school district. In each case, the deviation from the state average was found and the percent deviation calculated by dividing the actual deviation by the state average.

1. Annual Current Expenses Per Pupil in Average Daily Attendance - These data were obtained from the Annual Financial Reports collected by the Division of Finance from the local districts and the Superintendents' Annual Statistical Reports collected by the Division of Pupil Personnel. The total current expenses were divided by the ADA to arrive at the figure. Current expenses include administration, instruction, attendance services, health services, pupil transportation, operation of plant, maintenance of plant, and fixed charges.

2. Average Annual Salaries for Classroom Teachers - The data necessary for this category were obtained from the 1977-78 salary bulletin published by the Department of Education. The salaries listed are confined to the average of all classroom teachers in a district excluding salaries of administrators, principals, supervisors, etc. The present salary bulletin includes teachers paid from federal funds.

3. Percent Supplement, by District, for Instructional Salaries - The data necesary for this calculation were obtained from a publication of the State Department of Education, Foundation Program Expenditures by Category, and from the salary schedules which include only state funds. The bulletin on the distribution of state funds is produced by the Division of Finance, and gives the approximate percent of the Minimum Foundation Program that would normally be directed toward instructional salaries. This figure was subtracted from the total salary paid to all certified personnel in a district as listed on the state salary schedules. The difference represented the district's supplement for instructional salaries and was divided by the total salary for all certified personnel to find the district's percent supplement.

4. Percent of Instructional Staff with a Rank II or Higher - The type of degree held by a certified person can be ascertained from the salary schedules submitted to the State Department by the local districts. The number of staff with a Rank II or higher (Standard Certificate and Masters Degree or the equivalent) was then totaled for each district and divided by the total staff to find the percent of total staff with a Rank II or higher.

5. Percent of Ninth Graders Completing High School - The Superintendent's Annual Statistical Report submitted by the local districts to the Division of Pupil Personnel is the basis for this calculation. It lists the total graduates by age and enrollment by grades. The number of graduates was divided by the number of ninth graders enrolled in 1973-74. In districts which have merged or experienced a significant enrollment increase or decrease, the figure can be misleading.

6. Percent of Attendance - This is also listed on the Annual Statistical Report and is found by dividing the aggregate days attendance by aggregate days membership.

7. Local Financial Index - The basis for this computation is the statistics found in the bulletin, Public School Financial Analysis, published by the Department of Education. The index was derived by dividing the local revenue per child in average daily attendance by the assessed value per child in average daily attendance. This index measures the amount of effort a community puts into support of its schools, based upon its ability to pay.

8. Cost Per Pupil for Educational Materials - The totals for educational materials were found by adding the account items dealing with library books, periodicals and newspapers, library supplies, audio-visual materials, tests, supplementary books, and teaching supplies which include Codes 251-258; 261-266.03; and 268 (on the Annual Financial Reports for the 1977-78 school year) and dividing by ADA.

9. Cost Per Pupil for Instruction - Instruction costs were calculated by dividing the total spent for Instruction (Line 1 of the Annual Financial Reports) by the average daily attendance. The total for instruction excluded money spent in this area from Title I and IV of ESEA. (This exclusion is due to accounting requirements for federal reporting.)

10. Percent of Instructional Staff with Less than Rank III - This factor compares the number of certified personnel not fully qualified in realtion to the total professional staff. The source of this information is the 1977-78 approved salary schedules.

11. Teacher-Pupil Ratio - This factor was calculated by dividing the enrollment obtained from the Superintendents' Annual Statistical Report by the total number of classroom teachers as reported on the federal and state salary schedules.

12. Percent of High School Graduates Entering College - The School Data Form is the source of graduates entering college. High school graduates are reported on the Superintendents' Annual Statistical Report and divided into the number entering college.

13. Cost Per Pupil for Administration - This factor was calculated by dividing the total spent for administration (Line H of the Annual Financial Report) by the number of students in average daily attendance.

14. Percent of Revenue from Local Sources - This item illustrates the percent of total revenue from local sources as indicated on the Annual Financial Reports (account codes 11-35 and below the line account codes 94.11, 94.21 and 94.31). This total excludes non-revenue receipts in the calculation of the percent of revenue.

15. Percent of Revenue from State Sources - This figure is the total posted in account codes 41-45 and below the line receipts 94.12 and 94.22 of the Annual Financial Report.

16. Percent of Revenue from Federal Sources - This percent consists of receipts posted in account codes 51-54, 61-62, and below the line codes 94.13, 94.23, 94.33, 94.43, 94.53, 94.14, 94.24 and 94.34.

17. Percent of Economically Deprived - This was taken from records in the Title I Office indicating the percentage of children eligible for Title I ESEA benefits in proportion to total children of school age in the district. This should explain more fully the expenditure of federal funds.

State Averages and Trends

The state averages for the school year 1978-79 are reported in the last column of Table 1. All 17 factors included in this year's Profiles of Kentucky Public Schools have been reported in the last 11 publications as well. In order to present a brief view of the state trends on each of these 17 factors, the state averages for each of the past 12 years are reported in Table 1. Figures 1 through 17 graphically display these trends. Not all 17 factors will be discussed in detail in this text. Trends are, for the most part, apparent in these graphs which are available for the reader's inspection.

The Expenditures Per Pupil in ADA, portrayed in Figure 1, is of particular interest. As can be seen over the 12-year period, there has been a steady rise in this figure. In 1967-68, the state average for this category was $391. The state average in 1978-79 was $1210, an increase of about 209 percent over the 1967-68 figure. Also of interest is the Average Salary for Classroom Teachers (Figure 2). This factor has also experienced steady growth from an average of $6,010 in 1967-68 to $13,170 which is an increase of about 119 percent of the 1967-68 figure. As can be seen in Figures 8, 9, and 13, Expenditures Per Pupil for Instruction, Instructional Materials, and Administration have also been rising.

Percent of Teachers Holding a Rank II or Higher certificate has been increasing, while Percent of Teachers Holding Less than a Rank III certificate has declined (Figures 4 and 10). Less than one-half of one percent of Kentucky;s teachers hold less than a Rank III certificate, while over fifty percent hold at least a Rank II certificate. Pupil/Teacher Ratio is also declining (Figure 11).

Percent of Students in Average Daily Attendance (Figure 6) is somewhat discouraging in that this percent has shown a slight but steady decline over the past 12 years. In 1967-68, Percent of Attendance was at a high of 94.1 percent and was at a low of 92.4 percent in 1977-78. It is encouraging to note a slight increase to 92.7 percent in 1978-79. Hopefully, the trend will begin to move upward.

Also of concern is the irregular pattern in the Percent of Ninth Graders Completing High School. One would have hoped to have seen a steady increase in this trend (Figure 5); however, the pattern, although somewhat irregular, clearly indicates a decline in percentage of ninth graders completing high school. We have gone from a high of 68.2 percent in 1971-72 to a low of 61.7 percent in 1978-79. It would seem that a top priority of public education would be to reverse this trend.

Sources of school revenue also contain some interesting patterns (Figures 14-16). While Percent of Revenue from Federal Sources has remained rather constant, Percent Revenue from Local Sources has dropped over the last two years, while Percent Revenue from State Sources has increased. This can, for the most part, be attributed to the large increase of public schools by the state in the last two years.
